Full-Stack Developer Specializing in MERN Stack with Strong Foundations in Data Structures, Building Secure, Scalable, and High-Performance Web Applications

PROJECTS

LeetCode Clone

A web-based LeetCode clone that allows users to log in, solve coding problems using an integrated code editor, and verify solutions by executing code against test cases.

College Cart

A university-based web platform that helps students request groceries and essential items from nearby shops. Students can post requests, and the student of same college outside the campus can accept them, purchase the items, and deliver them for a delivery fee. The system ensures safe transactions using secure payments and delivery confirmation to prevent fraud and ensure reliability.

Quiz App

A web-based quiz application where users can log in, take quizzes on their preferred topics, view their scores and correct answers after completion, and check their overall rank among all users on the platform.

Bird Bar game

A web-based Flappy Bird–style game where the player has full control of the bird using keyboard arrow keys to move up, down, left, and right, providing enhanced gameplay and greater control compared to the original version.

SKILLS

Programming languages: c , c++ , java , python , java script,Dart
Frontend Development :React.js , HTML , CSS ,Responsive UI Design
Backend Development :Node.js , Express.js , RESTful APIs ,
Authentication App Development :Flutter
Databases :MongoDb , MySQL , PostgreSQL
Tools :Github , Git
AI :Claude Opus,Claude Sonnet,Codex,Antigravity

Education

Bachelor of technology in computer science 2024 -2028
National Institute of Technology Andhra Pradesh **GPA**: CGPA: 8.73
